

Just Us Kids Pediatrics

- Well Child Visit (Required once per year):

A Well Child visit is a combination of screenings and assessments that will help the provider review growth, development, milestones, daily healthy habits and any overall health concerns you may have. A full head to toe exam is completed along with a CBC, urinalysis, and lipid screen (depending on age). Your child will also receive any vaccines at this time if needed. Well check up visits can be scheduled with any provider at JUKP.

- Initial ADHD visit:

The initial visit you will discuss diagnosis, review results of neuropsychological evaluation or previous diagnostic testing/history. Discuss genetic testing and medication options and/or go over medication history. A general physical exam including blood pressure and weight will be performed as well.

- 1 month follow up visit:

A 1 month follow up visit is required for all patients who have started a new medication or made any changes with the dosage of medications. This visit is specifically with Dr. Justice who will ensure your child is having optimal benefits of new or changed medications.

- 3 and 6 month ADHD visit : (May be combined with well child visit if within an acceptable time frame.)

This visit is specifically with Dr. Justice or Sarah Cline PA-C to address any concerns regarding your child's ADD/ADHD medications and behavior. Weight and blood pressure will be very closely monitored at these visits to make sure the medication is not causing any unwanted side effects.

Medication refill tips:

Only Dr. Justice can send controlled substances into pharmacy. Please watch our Facebook page or website for updates on her schedule in office.

Medication refills need to be called into office with 48-72 hours notice. Please monitor when your medication will be out.
